

Play Before Pixels sticker sheet

One kiss-cut vinyl sheet with five stickers: the Maker's Seal, a ball, a block tower, an open book and our name. Sold to grown-ups for laptops, bottles and planners. No slogan, and no condition or health words anywhere.

STICKER	DIE-CUT FILE	SIZE
The Maker's Seal	<code>print/die-cut/seal.png</code>	2.63 × 2.63 in
Ball	<code>print/die-cut/ball.png</code>	1.71 × 1.71 in
Block tower	<code>print/die-cut/blocks.png</code>	1.15 × 2.68 in
Open book	<code>print/die-cut/book.png</code>	2.71 × 2.13 in
Our name	<code>print/die-cut/lockup.png</code>	4.63 × 0.92 in

Print files (partner-typical sizes, UNVERIFIED)

FILE	SIZE	USE
<code>print/sticker-sheet.png</code> + <code>.svg</code>	1749 × 2481 px, 5.83 × 8.27 in, 300 dpi	kiss-cut sheet
<code>print/sticker-sheet_cutlines.svg</code>	same size	cut contours (CutContour), if the partner asks
<code>print/die-cut/*.png</code>	each at its own size, 300 dpi	single die-cut stickers, if sold one by one later

FILL IN on setup day: the partner's sheet template size and whether it cuts from its own contour or from the cut file. Adjust W, H or BORDER in `build/build.py` and run `bash build/render.sh`.

For grown-ups. Never a toy.

Choking and small parts (UNVERIFIED legal reading; confirm with a product-safety attorney).

- Stickers peel off into small, thin pieces a young child could put in the mouth. The sheet margin, every listing and the FAQ say: **“Not a toy. Keep away from young children.”**
- Marketed to adults only: laptops, bottles, planners. No kid models, no “for kids” words or tags, no nursery or classroom photos, no children’s gift guides.
- Stickers with toy pictures could be read as a children’s product (CPSIA factors include marketing, packaging and appeal). If that ever happens, stop selling; children’s products stay held until third-party testing and a Children’s Product Certificate are funded.

Logo and motif rules. The spinning top appears only inside its seal (logo guidelines: nowhere else does the top appear without its disc). The blocks are an illustration stacked as a tower, never a 2 × 2 grid or a brand mark.

Sample gate (full list in QUALITY-STANDARD.md)

1. Order one sheet in the chosen finish (matte first).
2. Check colors, the white borders and that every kiss-cut lifts cleanly.
3. Stick one on a bottle: 24 hours in water, then 10 hand washes. No lifting, fading or smearing, or the listing must not say waterproof.
4. Record PASS or FAIL in panel.md. No listing goes live before PASS.

PRICE AND PROFIT

One everyday price, every channel over the floor

Floor: at least 30% margin on a print-on-demand sale (commerce/PRICING.md §2). The buyer pays the partner’s shipping rate at cost. Cost is a typical partner cost, UNVERIFIED; fees as modeled across the repo, UNVERIFIED. Figures come from `build/pricing.py` .

ITEM	PRICE	PARTNER COST + SHIP	FLOOR	ETSY	GUMROAD	OWN SITE
Sheet of 5	\$15	\$6.00 + \$4.49	\$4.50	\$5.95 (40%)	\$4.94 (33%)	\$7.38 (49%)

Tight on Gumroad. The floor holds only while the partner charges \$6.44 or less (Etsy \$7.45, own site \$8.88). Above that, raise the everyday price to \$16 before launch, or skip Gumroad.

Keep Etsy Offsite Ads off. An ad-driven sale would net about \$3.02, under the \$4.50 floor.

Best as an add-on. marketing/DEMAND-CHECK.md rates stickers weak and bundle-only, so the main use is an add-on beside a tee or mug in the same order, where shipping adds little.

Honest pricing: one everyday price, \$3 a sticker. No “was” price, no permanent sale, no countdown.

Founder choices, then the next step

Human authorship (commit each change to git)

FILL IN: your choice of stickers, their sizes, colors and layout, and matte or gloss.
Edit build/build.py and run bash build/render.sh.

FILL IN: any sixth sticker you draw or choose yourself (no slogans unless brand/ORIGINALITY.md keeps them).
